The Global Leader in Performance Toilets.™

To learn more, visit KOHLER.com
Kohler is redefining what it means to offer performance toilets to our customers. Where flushing power is concerned, Kohler offers a variety of performance-driven technologies that deliver more than enough force to meet any residential or commercial need. Where water conservation is important, Kohler also excels, with five eco-friendly technologies featuring High-Efficiency Toilet (HET) models that save thousands of gallons of water per fixture per year. And for additional hygiene, a variety of models are engineered to rinse the bowl completely clean with each flush. Add an extensive selection of unique colors and innovative design options and it’s easy to see why KOHLER® is the global leader in performance toilets.
Kohler understands that there are many aspects of performance that matter to our customers. Measuring plug resistance, bowl cleanliness and sound levels are just a few of the tests Kohler conducts to ensure that every toilet will perform, time and time again. The following facts about our testing demonstrate our commitment to offering only top-quality toilets to our customers.

**PLUG RESISTANCE**

The number one customer need is plug resistance. Kohler conducts rigorous tests to measure this important aspect of performance.

PAD TESTING – The main cause of plugging is toilet tissue. This test represents the removal of toilet tissue during each flush. KOHLER toilets consistently flush 36 to 54 sheets of tissue per flush.

MISO PASTE – This test measures the quantity of solid waste that is removed per flush. Most KOHLER toilets flush 500-1,000 grams of material, while all KOHLER toilets consistently flush in excess of 250 grams of material – the approximate average male output. It is important to understand that a higher score in this particular test does not necessarily equate to better performance.

**BOWL CLEANLINESS**

Another important measure of overall performance is the bowl cleanliness after each flush. Testing cleanliness allows Kohler to develop flushing technologies that minimize routine cleaning of your toilet.

RIM WASH TEST – This test is designed to measure a line of residue material (felt-tip marker) left on tough-to-clean areas of the bowl surface – 1” under the rim, after a single flush. All KOHLER toilets pass this required test.

RESIDUE TEST – This more rigorous Kohler test involves spraying a thin coat of residue on the interior of the bowl, letting it dry, and then flushing the toilet. This measures the amount of material left on the entire bowl surface above the water line. Many KOHLER toilets will remove virtually all residue in a single flush.
Since KOHLER toilets deliver worry-free performance, you have the freedom to choose from an extensive selection of one- and two-piece models featuring the industry’s largest breadth of innovative technologies.

**ADDITIONAL TESTING**

From flushing power and water usage to consistent functionality, Kohler conducts additional tests that help provide total toilet performance.

- **DRAIN LINE CARRY-OUT** – This measures the distance that material is moved from the toilet in the sanitary waste line in a single flush. This test ensures waste does not plug downstream from the toilet before it reaches the main sanitary system. The minimum required distance by code is 40 feet. All KOHLER toilets are designed and tested to exceed 42 feet.

- **WATER USAGE** – This verifies that the water usage per flush matches the stated amounts to ensure that KOHLER toilets utilize a consistent amount of water per flush.

- **STABILITY TESTING** – With this test, KOHLER toilets are flushed hundreds of times, and data is collected to ensure consistent, stable performance, flush after flush.
KOHLER® toilets engineered with gravity-fed technologies maximize the natural force of water to deliver extraordinary bulk flushing power and incredibly clean performance. Choose from an extensive variety of stylish one- and two-piece models featuring Class Six™ and Class Five™ technologies, including HET (High-Efficiency Toilet) models that utilize only 1.28 gallons of water per flush for significant water saving. These performance-driven toilets – available in an exciting array of KOHLER designs and colors – offer peace of mind and added value to your home or business.

**Powerful Flush**
Class Six and Class Five technologies lead the way in providing extraordinary bulk flushing power with a 3¼-inch flush valve and a 2⅝-inch fully glazed trapway.

**Easy Installation**
Exclusive DryLock™ system on Class Six and Class Five two-piece models reduces installation time by 40%.

**Water-Saving Options**
All KOHLER gravity-fed toilets feature optimized flushing performance at the government-mandated 1.6 gallons per flush. However, Class Six and Class Five technologies are engineered with water-saving options, including HET toilets that utilize only 1.28 gallons per flush.

1. An optimized rim wash for the new Cimarron® Comfort Height® toilet is designed to rinse the bowl with each flush for exceptional cleanliness.
2. The direct-fed jet maximizes water momentum to deliver extraordinary bulk flushing power.
3. DryLock system reduces installation time by 40%.
Assisted Technologies

KOHLER® toilets with assisted flushing technologies are engineered to provide remarkable power, significant water saving – including HET models that are WaterSense™ certified – and unique design options. Pressure Lite® toilets utilize compressed air within the pressurized vessel, and Power Lite®, toilets feature a .2-hp pump, to optimize flushing performance.

**Powerful Flush**
Pressure Assist functionality delivers robust, commercial-grade flushing power

**Quiet Performance**
Advanced noise-mapping and frequency analysis ensure quiet performance

**Water-Saving Options**
1.4- and 1.0-gallon models save 2,000 – 6,000 gallons of water per fixture per year*, and 1.0-gallon toilets qualify as High-Efficiency Toilets

1. The internal vessel is pressurized to accelerate the water, providing robust performance with each flush

*Based on usage of 10,000 flushes per year using a 1.6 gpf toilet
Water-Saving Options
1.4- and 1.0-gallon models save 2,000 – 6,000 gallons of water per fixture per year.*

Quiet Performance
Double seal on pump system reduces motor noise for added privacy

1. **Exclusive Twin Touch™ actuator** on San Raphael Power Lite models provides a 1.0-gallon flush for light (liquid) waste or a 1.4-gallon flush for solid waste

2. **.2hp pump** delivers a consistent, powerful and quiet flush

*Based on usage of 10,000 flushes per year using a 1.6 gpf toilet

Note: Due to their electric motors, Power Lite toilets require 120V, 15A and 60 Hz electrical receptacles protected by Class A GFCI
KOHLER® toilets with Dual Flush technology combine exceptional water conservation and outstanding flushing performance. A user-friendly, two-button actuator allows you to choose either a 1.6- or .8-gallon flush option. Additionally, their skirted bowls offer a sleek, contemporary design aesthetic and an easy-to-clean surface.

**Gravity Dual Flush Technology**

Exceptional water saving and contemporary styling.

**Significant Water Saving**

On average, Dual Flush toilets utilize 20% less water than models that only flush 1.6 gallons, which qualifies them as High-Efficiency Toilets, and the .8-gallon flush option can save up to 8,000 gallons of water each year*.

**Easy to Clean Designs**

KOHLER toilets with Dual Flush technology feature design characteristics that accommodate bath and powder rooms with a transitional or contemporary aesthetic.

**Hygienic Bowl**

The integral sanitary guard on two-piece toilets prevents liquids from collecting under the tank.

**Dual Flush technology** is precision-engineered to maximize 1.6- and .8-gallon flush options that offer exceptional performance and water conservation.

*Based on usage of 10,000 flushes per year using a 1.6 gpf toilet

Design Options

KOHLER® toilets will provide you with exceptional performance across all flushing technologies. That means you have the freedom to choose from an unrivaled selection of styles, shapes and colors to suit your individual preferences. From various bowl shapes and Comfort Height™ models to features like concealed trapways – the design possibilities for your bath or powder room are as extensive as your imagination.

**COMFORT HEIGHT TOILETS**

With a seat height comparable to that of a standard chair, KOHLER Comfort Height toilets make sitting down and standing up easier for people of all ages and statures. Additionally, most Comfort Height toilets comply with the height requirements of the Americans with Disabilities Act. Available with a variety of performance-driven flushing technologies, Comfort Height toilets take comfort, performance and design to new heights.

**WHAT STYLE OF TOILET DO YOU PREFER?**

**One-piece toilets** integrate tank and bowl into a seamless, space-saving design that is easy to clean. Most one-piece KOHLER toilets ship with a complementary Quiet-Close™ toilet seat with Quick-Release™ functionality.

**Two-piece toilets** feature the traditional design of a separate tank and bowl. Two- and three-bolt installation systems provide a sturdy, level connection between the tank and bowl, making installation easy.

**One-piece toilets with bidet functionality** combine a one-piece toilet and the additional comfort and hygiene of a C3™ toilet seat into a seamless design.

**WHAT ARE THE BENEFITS OF THE DIFFERENT BOWL SHAPES?**

**Round-front bowls** require less space.

**Elongated bowls** provide added comfort for adults.

**Compact elongated** one-piece toilet designs enable an elongated bowl to fit in a round-front space.

**WHAT IS A CONCEALED TRAPWAY?**

Toilets with a concealed trapway feature a smooth surface at the back end of the toilet where the trapway would normally be visible. This facilitates easy cleaning and enhances the design of the toilet.

**WHAT IS A SKIRTED TRAPWAY?**

Toilets with a skirted trapway are designed with no horizontal ledges along the bowl. This provides a streamlined aesthetic and an easy-to-clean surface.
San Raphael® Comfort Height® Power Lite® one-piece toilet in Mexican Sand® - K-3393-33
Kohler offers an innovative color palette with families of complementary shades of green, blue, red, grey, neutrals and white. This rich variety demonstrates the versatility of KOHLER colors and their ability to heighten the surfaces, materials and designs in your bath or powder room. Best of all, these colors stand the test of time. Our selection is not driven by trends, but by each color’s natural origins and the emotion it elicits. That’s why color is the ideal mode of self-expression in the home. Choosing hues that reflect your personality allows you to decorate with confidence.

*The Complete Solution toilets include the toilet tank, toilet bowl, KOHLER® toilet seat, wax ring and floor bolts. Everything you need for installing your toilet is included within one convenient box. Supply lines must be purchased separately.

**One-piece toilet with bidet functionality combine a toilet and the additional comfort and hygiene of a C™+ toilet seat into a seamless design.
Choosing the right toilet seat is as important as the toilet you select. That’s why KOHLER toilet seats are ergonomically designed to ensure complete comfort for all users. The perfect fit for all one- and two-piece KOHLER toilets, these seats feature uncompromising quality, enduring craftsmanship and innovative technology. Available in a wide selection of styles and colors, as well as with functional innovations and artistic surface designs, KOHLER toilet seats add the finishing touch to any bath or powder room.
