Bardon™ Wall-Hung Urinals

The redesigned KOHLER® Bardon urinal provides flexible flushing options. Based on the chosen flushometer, Bardon will operate in the range of 0.125 to 1.0 gallons per flush. When paired with a 0.125 gpf flushometer, this urinal qualifies as a high-efficiency urinal (HEU), which can help a building earn water-efficiency points in the LEED rating system.

Splash protection
Patent-pending design reduces splashback for a cleaner experience. Extended lip keeps the floor cleaner

Increased drain flow
Increased trapway diameter and low-profile strainer allow the tray to drain faster which prevents overflow

Reduces inventory
Bardon pairs with flushometers ranging from 0.125 to 1.0 gpf, eliminating the need to stock multiple urinals. It is also available with top or rear spud

Rigid snap-in stainless steel strainer
Stainless steel strainer resists corrosion and snaps in place to prevent shifting

Water savings
Meets WaterSense® guidelines when paired with a 0.125 or 0.5 gpf WaterSense-labeled flushometer

Improved design
Sharp lines create bold, contemporary style

Touchless urinals
The touchless flush delivers hygienic and dependable performance
