Only KOHLER Genuine Parts (OEM)

- Certified to meet all codes and standards
- Made with quality material
- Protect the warranty of the product
- Assure optimal performance
Most KOHLER, toilets feature the AquaPiston® canister flushing system.

AquaPiston Flush Engine
No flapper. No leaks. No problem.

Efficient Intake
Water enters the valve from 360 degrees, increasing the power and effectiveness of the flush.

Light-Touch Flush
Less chance for a short flush.

Maximum Power
The 3:2 ratio between valve intake and outlet harnesses the natural force of gravity and optimizes flush performance.

Just because it looks like Kohler or it says “for”, “fits” or “replaces” Kohler does not mean it’s a KOHLER Genuine Part.

Why put your reputation on the line by using non-OEM service parts that can cause poor flushing, leaking valves, greater noise and more water usage?

KOHLER Genuine Parts are designed by Kohler engineers to work specifically in KOHLER products. Non-OEM parts are not.

Guarantees: Designed by Kohler Engineers, Premium Materials, Precision Tooling, Extensive Testing, ASSE- and ASME-Compliant, Exact Fit, Protects Warranty of Product

In addition to chlorine, Kohler tests chloramines, in-tank cleaners and concentrated tablets to ensure KOHLER flappers seal properly for a consistent flush and optimal performance.

Your customers purchase KOHLER, for our excellent quality and exceptional service, so why would you use anything but KOHLER Genuine Parts?
