Notes
Measure your actual product for rough-in details.
Install this product according to the installation
instructions.

The hot water supply should be 70% of the
capacity of the bath or greater. Installations will
vary.

Pump must be relocated to custom position at
the time of installation. Provide adequate
clearance.

Kit is required for under-mount installations (sold
separately).

Cast iron whirlpools are extremely heavy, making
some drop-in installations difficult. Splitting the
deck/surround is recommended if installing into
a deck.
